

Introduction

Thesis Research

Thesis Writing

- Thesis writing is a process of decision making for the design projects.
- It depends on analysis mostly and stands on analytical thinking.

Chapters

- Chapter 1: Introduction.
- Chapter 2: Similar examples studies.
- Chapter 3: Site analysis.
- Chapter 4: Building the space program.
- Chapter 5: Zoning and concept making.

Definition

- The first thing an introduction chapter includes is the definition of the project and what it is in general.
- It defines the main functional typology and the nature of the project.

Scope of Work

- One of the most important things that this phase defines is the scope of the work or the limits of the project.
- It must clarify the general approach or the limitations at which the project will stop.

Aims and Goals

- Aims and goals are also decided within the chapter.
- Goals must be architectural.
- Aims and goals become generator of the ideas needed to guide the design process.

Other Points

- Sometimes a historical review is needed to enrich the project choice.
- Every chapter mostly have an introduction paragraph and a conclusion paragraph.
- In some cases, a problem statement is added with suggested solutions.
