										Pupil reaction																			
Temperature															+ pupil reacts to light - no reaction C - eye is closed														
Respirations																													
<b>PUPILS</b>										Right					Size														
															Reaction														
<b>PUPILS</b>										Left					Size														
															Reaction														
<b>GLASGOW COMA SCALE</b>										<b>E-Eyes Opening</b>					Spontaneously					4									
															To speech					3									
															To pain					2									
															No response					1									
										<b>M-Motor Response</b>										Obeyes command					6				
																				Localizes pain					5				
																				Flexion-withdrawal					4				
																				Flexion-abnormal					3				
																				Extension-abnormal					2				
																				No response					1				
<b>V-Verbal Response</b>										Oriented					5														
										Confused					4														
										Inappropriate words					3														
										Incomprehensible					2														
										No response					1														
										<b>TOTAL SCORE</b>																			
E+M+V=TOTAL SCORE										Total score: 15 - best response, 13-15 mild brain injury, 9-12 moderate brain injury, 3-8 severe brain injury																			
<b>LIMB MOVEMENT</b>										<b>ARMS</b>					Normal power														
															Mild weakness														
															Severe weakness														
															Spastic flexion														
															Extention No response														
<b>LIMB MOVEMENT</b>										<b>LEGS</b>					Normal power														
															Mild weakness														
															Severe weakness														
															Extention														
															No response														
Record right (R) and left (L) separately if there is difference between two sides.
